Questa è l'interfaccia per impostare le schede di rete:

pfSense → Firewall → Rules → WAN

pfSense → Firewall → Rules → LAN

pfSense → Firewall → Rules → OPT1

Firewall / Rules / Edit

Edit Firewall Rule

Action

Pass

Choose what to do with packets that match the criteria specified below.
Hint: the difference between block and reject is that with reject, a packet (TCP RST or ICMP port unreachable for UDP) is returned to the sender, whereas with block the packet is dropped silently. In either case, the original packet is discarded.

Disabled

☐ Disable this rule

Set this option to disable this rule without removing it from the list.

Interface

OPT1

Choose the interface from which packets must come to match this rule.

Address Family

IPv4

Select the Internet Protocol version this rule applies to.

Protocol

Any

Choose which IP protocol this rule should match.

Source

Source

☐ Invert match

☐ Invert match

Destination Address /

Extra Options

Log

☐ Log packets that are handled by this rule

Hint: the firewall has limited log space. If you have a lot of logging, consider using a remote syslog server (see [Status: System Logs: Settings](#))

Description

Default allow OPT1 to any rule

A description may be entered here, which will be used in the ruleset label and displayed in the firewall log.
